### The Five Behaviors of a Cohesive Team

Has your team made progress?

This report is designed to give you and your team insight into the progress you have made since you last took the assessment. Along with the original assessment questions, your team was given additional survey questions to help you pinpoint where improvement has been made and where it might still be needed.

Still, it's important to bear in mind that progress can be measured in more than one way. While your assessment scores can help uncover weak spots (and strengths), other ways to measure progress may include how it feels to show up for work every day and willingness to stick with this program. Furthermore, it should be noted that your scores can be affected by more than just your progress. A shift in team members, deeper understanding of the concepts, and willingness to answer more honestly should be factored into any changes you see.

Maintaining a cohesive team requires ongoing attention and effort. But it can be—and should be—a rewarding process that benefits everyone on the team. Before you begin, take a moment to refresh yourself on The Five Behaviors model:

#### Trust One Another

When team members are genuinely transparent and honest with one another, they are able to build vulnerability-based trust.

#### Engage in Conflict Around Ideas

When there is trust, team members are able to engage in unfiltered, constructive debate of ideas.

#### Commit to Decisions

When team members are able to offer opinions and debate ideas, they will be more likely to commit to decisions.

#### Hold One Another Accountable

When everyone is committed to a clear plan of action, they will be more willing to hold one another accountable.

#### Focus on Achieving Collective Results

The ultimate goal of building greater trust, productive conflict, commitment, and accountability is one thing: the achievement of results.

To better understand the model, read (and suggest participants read) Patrick Lencioni's *The Five Dysfunctions of a Team and/or The Advantage*.

## The Five Behaviors and Your Team

Below are your team's results for each behavior. The left side of the pyramid shows your results from the Friday, May 03, 2019 assessment. The right side of the pyramid shows your results from the Monday, February 03, 2020 assessment.

The change between the two scores:

### Summary of Your Team Survey Results

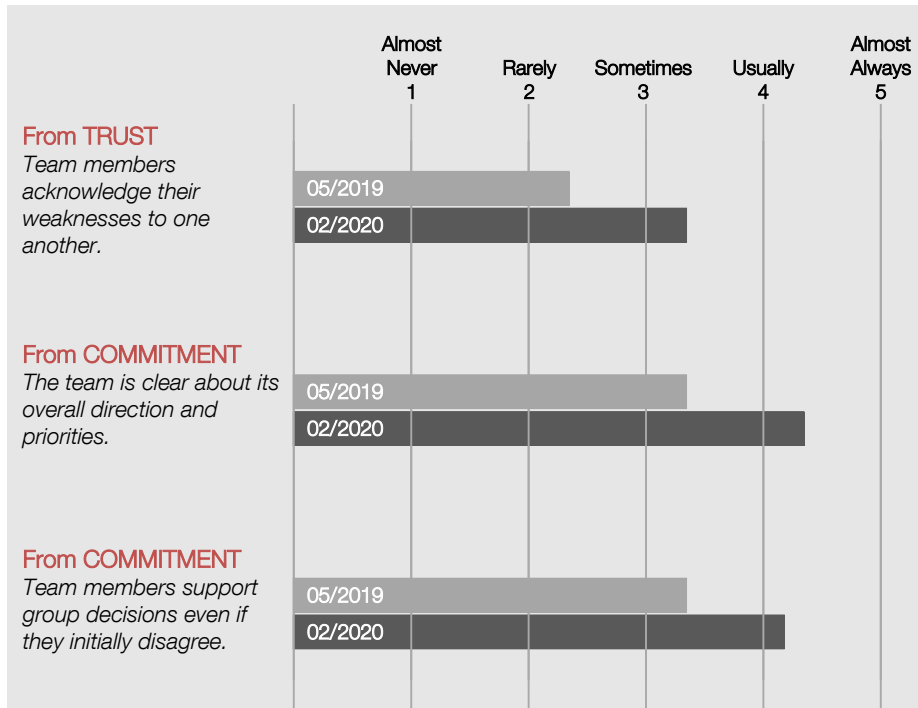

Your assessment scores indicate that commitment is likely an area of strength for your team, while results, accountability, conflict, and trust are potentially areas for improvement. Your team appears to have improved on all of the five behaviors since the last assessment.

## Overview

### Areas of Greatest Improvement

### Areas of Greatest Decline

Be prepared to answer questions about why scores declined. The decline could be because

- There was a change in team membership
- Participants understand the concepts better this time around, allowing them to answer more accurately
- Participants may have built a greater level of trust and answered more honestly

## Your Team's Evaluation

As part of the assessment, you and your team members had an opportunity to assess the overall progress, or lack of progress, you think your team made. The number of teammates who selected each option is indicated in the boxes below (out of 6 participants). Team members who did not participate in the last assessment should have indicated this on the team survey (you can find this tally at the bottom of the page).

*Did your team spend enough time working through the issues that came up during your last Five Behaviors session?*

**1** Yes **5** No

*Has your team functioned better since your last Five Behaviors session?*

**5** Yes **1** No

*Has your team become more productive since your last Five Behaviors session?*

**4** Yes **2** No

*Since the last assessment, what factors have kept the team from making more progress?*

*(Team members could select all that apply)*

**5** We were too busy

**1** People didn't know how, or didn't want, to make the necessary changes

**5** The topic just didn't come up much

**1** We didn't know what changes needed to be made

**1** We didn't make clear/specific goals during the last session

**0** We didn't know how to make the necessary changes

**1** We didn't allot time to address the changes we needed to make

**0** We didn't need to make more progress

"I did not participate in the last assessment" = 0

Participants who missed the last assessment were not asked to answer the questions on this page.

## Building Trust

Remember, the first and foundational behavior of a cohesive team is trust. The definition here isn't centered around the ability to predict a person's behavior based on past experience (a standard description). Rather, in the context of a cohesive team, **trust** means

- a willingness to be completely vulnerable with one another
- confidence among team members that their peers' intentions are good and that there is no reason to be protective or careful around the team

### Team Survey Results

The first row in each of the tables shows the spread of responses from your previous assessment to each of the trust-related questions. The second row in each table reflects your current results. To the right of the table, you will find the averages from each assessment. **These averages are based on a five-point scale.**

## Progress Building Trust

What has your team done to help improve trust?

As part of the assessment, you and your team members had an opportunity to address specific areas that may contribute to the level of trust on this team. The table below has two separate components. The box on the left illustrates the number of teammates (out of 6) that have noticed each level of change in the correlating behavior. The box on the right illustrates whether people on the team believe improvement is needed.

	Since the last assessment, my team does this			We still need to work on this
	More often	The same	Less often	
Readily apologizes	3	3	0	2
Lets go of grudges	1	5	0	3
Shares professional failures and successes	1	4	1	6
Considers one another's working styles	5	1	0	0
Shares personal information	4	2	0	5

"I did not participate in the last assessment"= 0

## Points of Discussion

1. A number of group members have noticed an increase in many of the behaviors above. What examples do you have to share? How has this contributed to the level of trust on your team?
2. Based on your team survey (page 6), your team seems to have a higher level of trust than last time. What do you think contributed to your higher score? What steps can the team take to continue building trust?

The number of team members who endorsed "We still need to work on this" is a separate head count. People had the option to suggest that continued improvement should be made.

Participants who missed the last assessment were not asked to answer the questions on this page.

These questions are tailored based on the team's responses above and results on page 6.

## Mastering Conflict

All great relationships, the ones that last over time, require productive conflict in order to grow. It's important to distinguish productive, ideological conflict from destructive fighting and interpersonal politics. **Productive conflict**

- is focused on concepts and ideas
- avoids mean-spirited, personal attacks

### Team Survey Results

The first row in each of the tables shows the spread of responses from your previous assessment to each of the conflict-related questions. The second row in each table reflects your current results. To the right of the table, you will find the averages from each assessment. **These averages are based on a five-point scale.**

## Progress Mastering Conflict

Where is your team on the Conflict Continuum?

When it comes to the range of different conflict dynamics in an organization, there is a continuum of sorts. At one end of the continuum is no conflict at all, marked by false smiling and disingenuous agreement. At the other end of the continuum is relentless, nasty, destructive conflict, with people constantly at one another's throats. Somewhere in the middle of those two extremes is the demarcation line where good, constructive conflict exists.

As part of the assessment, you and your team members had the opportunity to place yourselves on the conflict continuum and to answer questions regarding this placement. Here are the results of the team survey (6 people):

*Since the last assessment, our team has largely:*

Avoided conflict and maintained artificial harmony

Resolved many issues with productive conflict

Engaged in conflict that is destructive and mean-spirited

People=

*Since the last Five Behaviors session,*

Rarely      Some-times      Often

I hold back my opinions because I think they will cause tension.

3 3 0

I hold back my opinions because I don't think anyone will listen.

2 2 2

I feel that my opinions are overpowered by others.

2 1 3

"I did not participate in the last assessment"= 0

## Points of Discussion

1. A number of people on this team hold back their opinions for the reasons listed above. How has this impacted the team's productivity? What could the team do to encourage people to share their opinions more freely?
2. Based on your team survey (page 8), your team seems to have improved at handling conflict. What do you think contributed to your higher score? What steps can the team take to continue to engage in healthy conflict?

For more information on the Conflict Continuum, see pp. 42-43 in Patrick Lencioni's *The Advantage*.

Participants who missed the last assessment were not asked to answer the questions on this page.

These questions are tailored based on the team's responses above and results on page 8.

## Achieving Commitment

What do we mean by commitment? In the context of a cohesive team, **commitment** is

- clarity around decisions
- moving forward with complete buy-in from every member of the team, even those who initially disagreed with the decision

### Team Survey Results

The first row in each of the tables shows the spread of responses from your previous assessment to each of the commitment-related questions. The second row in each table reflects your current results. To the right of the table, you will find the averages from each assessment. **These averages are based on a five-point scale.**

The team is clear about its overall direction and priorities.

## Progress Achieving Commitment

What has your team done to improve commitment?

As part of the assessment, you and your team members also had an opportunity to identify specific commitment-related areas that may have improved since the last assessment and areas that should be improved moving forward. The number of people who agreed and disagreed with each statement appears to the right.

### Points of Discussion

1. According to the survey above, your team generally doesn't seem to think commitment has improved since the last session. What impact does this have on the team? How could more clarity and buy-in be achieved?
2. Based on your team survey (page 10), your team seems to have an even higher level of commitment than last time. What do you think contributed to your higher score? What steps can the team take to continue increasing commitment?

## Embracing Accountability

Accountability has become a buzzword—so overused and with so many different interpretations that it has lost much of its meaning. In the context of teamwork, however, **accountability** is

*The willingness of team members to call their peers on performance or behaviors that might hurt the team*

### Team Survey Results

The first row in each of the tables shows the spread of responses from your previous assessment to each of the accountability-related questions. The second row in each table reflects your current results. To the right of the table, you will find the averages from each assessment. **These averages are based on a five-point scale.**

## Progress Embracing Accountability

What has your team done to improve accountability?

As part of the assessment, you and your team members also had an opportunity to identify specific accountability-related areas that may have improved since the last assessment—or areas where it would be possible and desirable to hold one another more accountable. The number of people (out of 6) who selected each improvement appears in the corresponding box below. Note: You had the option to select all that apply.

### Points of Discussion

1. A number of group members think the team still needs to work on many of the statements listed above. Has the team worked on any of these since the last assessment? What can the team do to make sure this gets addressed?

2. Based on your team survey (page 12), your team seems to have a higher level of accountability than last time. What do you think contributed to your higher score? What steps can the team take to continue to improve?

The number of team members who endorsed "We still need to work on this" is a separate head count. People had the option to suggest that continued improvement should be made.

Participants who missed the last assessment were not asked to answer the questions on this page.

The questions are tailored based on the team's responses above and results on page 12.

## Focusing on Results

The ultimate goal of encouraging trust, healthy conflict, commitment, and accountability is to achieve results. And yet, as it turns out, one of the greatest challenges to team success is the inattention to results. In the context of a cohesive team, **results**

- refer to the collective goals of the team
- are not limited to financial measures, but are more broadly related to expectations and outcome-based performance

### Team Survey Results

The first row in each of the tables shows the spread of responses from your previous assessment to each of the results-related questions. The second row in each table reflects your current results. To the right of the table, you will find the averages from each assessment. **These averages are based on a five-point scale.**

## Points of Discussion

1. A number of group members have noticed an increase in many of the behaviors above. What examples do you have to share? How has this helped your team focus on results?

2. Based on the team survey (page 14), your scores were mixed regarding results. Why do you think this is so? How has your team's focus on results changed since the last assessment?

## Action Plan

Now that you have reviewed and discussed your assessment results, use the following action planning worksheet to identify the team's priorities for improvements and set specific goals. The team may choose to answer the questions as a group. Or, you could start by answering independently and then sharing and combining ideas.

1. What is the team doing well? Why do you think this is a strength for the team? How can you make sure the team keeps doing this well?

2. What does this team need to work on? Why do you think this area is troublesome for the team? In what ways does it impede the team's progress?

3. Come up with three action steps the team could take to improve, how they will be measured, and when you expect to see improvement.

This page will be a refresher for people who took the last assessment. People's Type Codes will remain the same. However, it may be new information for anyone who wasn't involved in the last assessment.

## Appendix: Your Type and Story

### Your personality type: INFJ

John Doe, because you are an INFJ, you likely have a good deal of intuition and foresight. You're probably good at dealing with complexity in people and issues by trusting your inspirations and ideas about what's right. While you tend to be both private and complex, you likely bring a quiet enthusiasm to projects and assignments.

Most likely, you enjoy predictability and order in what you do, and you tend to enjoy the opportunity to complete whatever you set out to accomplish. Starting too many projects out of sequence is not your idea of effectiveness. In fact, you aren't likely to take kindly to abrupt interruptions—even though you may not outwardly express much dissatisfaction or frustration.

Like other INFJs, you are probably a terrific listener. You can get so involved and empathic when understanding people from their perspectives that you may finish people's sentences or thoughts with surprising accuracy. Such deep empathy sometimes leads you to burden yourself with other people's problems. For this very reason, you may seem aloof and distant as a means of self-preservation.

It is probably critically important for you to like and be liked by whomever you associate with. But, if you have a feeling of hostility or dislike for someone, you covertly or overtly refuse to engage with them. Still, your distaste may not be easily perceived since you are always cordial and polite. You prefer one-on-one relationships, and you use your constant search for meaning and interpersonal warmth to organize, counsel, and inspire. Because you are so genuine and devoted, you probably work exceptionally well with people.

John Doe, like others with the INFJ type, your most valuable contributions to the workplace may include your dedication, originality, insight, acceptance of others, and gracious communication style. In fact, these are probably some of the qualities that others admire most about you.

INFJ

The next two pages show where everyone falls on the four dimensions. The current team is plotted, so if there has been any change in members since the last assessment, it will be reflected below.

## Appendix: Your Team and the Dimensions

Below you will find more information on the Extraversion-Introversion and Sensing-Intuition continuum. For both, you can see where you and each of your team members fall (out of 6).

### Extraversion—Introversion

The mode of our personal energy and the attitude we have toward others is expressed in the Extraversion and Introversion processes. Extraverts tend to be more gregarious and initiate in relationships more comfortably than those who prefer Introversion. Introverts tend to wait for someone to make the first move and then to respond to that move.

All of the team members are represented on the continua.

### Sensing—Intuiting

A Sensing preference leads individuals to pay attention to the tangible realities of the past or present. An Intuiting preference inclines someone to pay attention to a vision of the future. Someone with a Sensing preference is likely to want to know if there is a real payoff soon, while for someone with an Intuiting preference, a promise in the future can go a long way.

# Profile Page 19

## Appendix: Your Team and the Dimensions

Below you will find information on the Thinking-Feeling and Judging-Perceiving continuum. For both, you can see where you and each of your team members fall (out of 6).

### Thinking—Feeling

The processes of Thinking and Feeling are more easily controlled and directed at will. Thinking revolves around the objective and impersonal, while Feeling focuses on values and people. Both of these ways of selecting what to do or not to do are necessary and useful—it is a matter of preference and what people are more comfortable with.

All of the team members are represented on the continua.

### Judging—Perceiving

Those who prefer Judging tend to be more structured and usually have a need to finish whatever they're working on. They are apt to report a sense of urgency until they make a pending decision and then be at rest after it is made. Those with a Perceiving preference are usually delighted to switch mid-stream and do something else. They are apt to consider new possibilities and, after a decision is made, keep options open.

## Profile Page 20

This page is designed to help people acknowledge that we all handle tense situations differently. The unhealthy behaviors, in particular, are generalizations. This map reflects the current team, so if there has been a change in team members since the last assessment, it will be reflected below.

### Appendix: Conflict Team Map

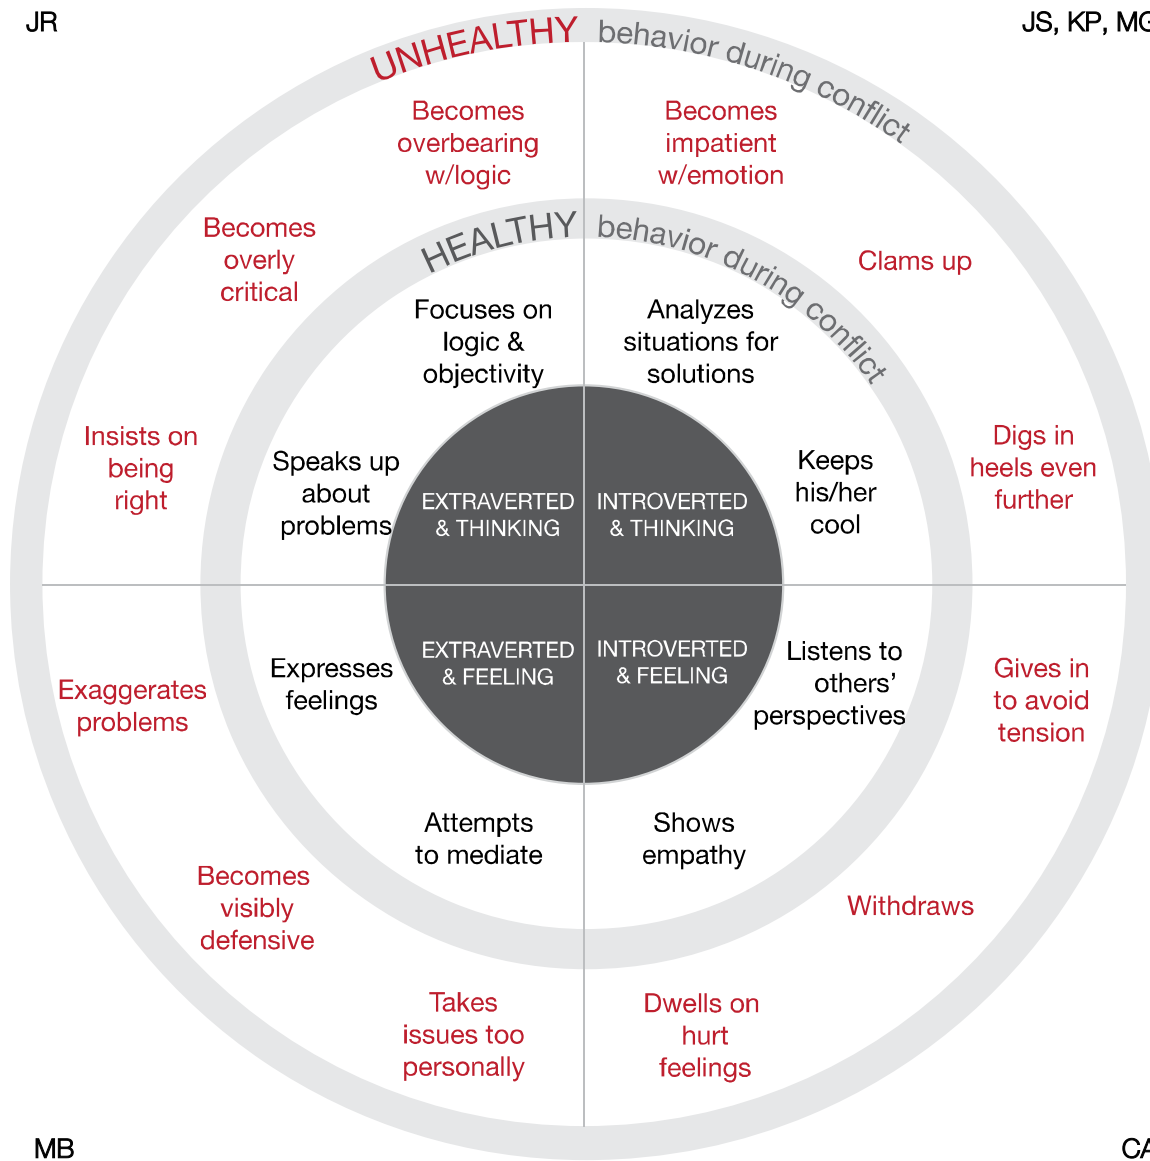

Below are descriptions of healthy and unhealthy responses to conflict as they relate to the Introversion-Extraversion and Thinking-Feeling dimensions. While anyone can engage in these behaviors, you may be more likely to demonstrate the behaviors that are within your region. Your team members' initials appear in their style regions below. **Your region is Introverted & Feeling**
